2018

REF04

Ver 1.1

The base of the Tumble Dryer is built from two large curved sections, commonly referred to as "Skateboard Ramps" which were released in a variety of sport-themed sets from 2002 through 2004.
These instructions are made with Dark Tan ramps, and matching Dark Tan parts throughout. Pictures of the module using each alternate colour is shown on the following page. Modern grey parts are used for highlights in the two grey models.

Module Revision Notes

Version 1.0 - Initial Release

Version 1.1 - Replaced 2 of 8L axles used to brace the non-basket sides of the rotating wheel with 3 of 2L axle connectors, to stiffen the bracing of the wheel to remove the ability to "squish" the sides of the wheel if it is picked up by the wheel accidentally, instead of picked up by the frame.
